Date: 25.05. 15:00 - 16:00

Participants:
      Time Keeper: Lea Schablack
      Moderator: Leon Schoch
      Note Maker: Erika Frank
      Reviewer: Christian Misch

Focus: Check if code is production ready
    Goals:
- No unnecessary logs that the user should not see
- Clean code
- Correct error handling

Components for Review:
Code Quality: 9/10 (Users are not shown an error when their input is faulty. Leftover logging)
Performance: 10/10
Security: 5/10 (Injection checking is handled by different part of code)
Scalability: 10/10
Maintainability: 10/10

Review methodology: formal code review

Result:
Outcome from the meeting, e.g., action items (with responsible person and
deadline), best practices, lessons learned.

Lessons learned:
- Better code review to catch code meant for testing
- More accurate error throwing to make development easier and allow the end user to detect problems

```javascript
function sendCredentials() {
  var username = document.getElementById("username").value;
  var password = document.getElementById("password").value;

  var data = new FormData();
  data.append("username", username);
  data.append("password", password);

  fetch("/login", {
    method: "POST",
    body: data
  })
  .then(response => response.json())
  .then(result => {
    console.log(result);
  });
}
```
